

Topic: Steamloc steamquench Optimizer – sealing top inlet at gauge.

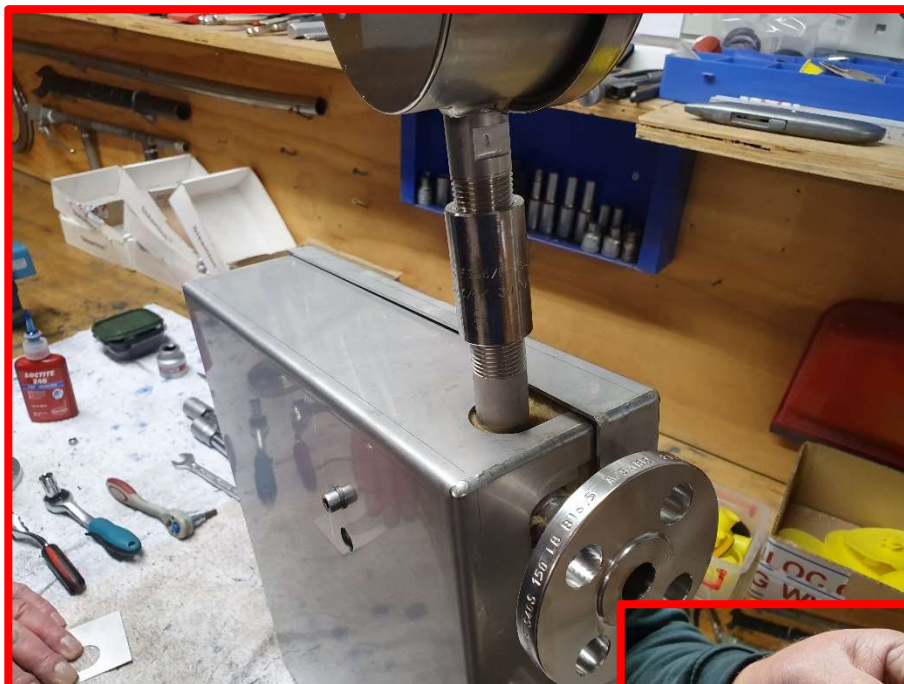

Last month feb 2020 we developed a solution for sealing in the field of the top pressure gauge inlet to prevent rain water.

Note: all Optimizers from march 2020 will be sealed at our shop before shipping. This instruction is only for Optimizers shipped before march 2020.

How to attach the closure stainless plate if you have a Optimizer already installed without top seal.

The pictures speak for themselves.

Plates can be obtained for free . email to: info@steamloc.org
